

5G FILTERED AERIALS

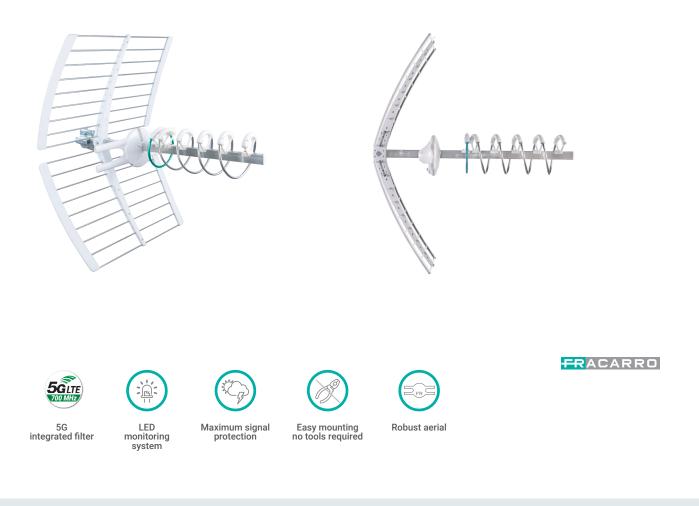

ELIKA PRO 700 C

The Elika PRO 700 C is Fracarro's unique active helical UHF band aerial used to receive digital terrestrial signals complete with LED monitoring system.

It can be **assembled and fitted without tools**, has pre-mounted director elements, quick-fit balun and reflectors and mast bracket with elevation adjustment. The **automatic gain control (AGC)**, signal monitoring LED, shielding and **new 5G LTE filter inserted in the dipole** make the ELIKA PRO 700 C aerial the ultimate evolution of Loop Yagi technology. **It is patented by Fracarro and compliant to 2014/53/UE** (RED – Radio Equipment Directive). This aerial stands out for its high gain (47.5dBi), extraordinary directivity and almost **total absence of the lateral lobes** making this aerial ideal for receiving DVB-T2 signals.

The new **single cardboard packaging** guarantees greater protection during transport and makes it easier to store.

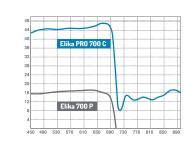

2

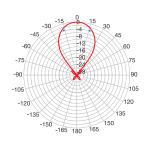

ELIKA PRO vs ELIKA

Elika PRO: Automatic gain control (AGC) and extraordinary directivity

Elika: High gain (17.5dBi) and extraordinary directivity

LED ALIGNMENT SYSTEM

Elika PRO is the only aerial with **LED assisted alignment**, patended by Fracarro.

213233 - **Elika PRO 700 K** kit version available with PSU342

ELIKA 700 C

The Elika 700 C is a **helical UHF band aerial** with a **5G LTE filter inserted in the dipole** which stands out due to its **high gain** (17.5dBi) and **extraordinary directivity**. It is ideal for managing DVB-T2 signals which require extra protection from interference and provides good signal quality into the distribution network or outlets.

No tools are required for assembly and mounting of the aerial. The ELIKA 700 C is **packaged singly in cardboard** guaranteeing greater protection during transport and making it easier to store. Also available with single plastic bag packaging, code 213228 - **ELIKA 700 P**

no tools required

5G integrated filter Robust aerial

ALPHA 700 Series

Loop Yagi UHF band aerials with a **5G filter inserted in the dipole** which stands out for its **high gain**, impedance matching and directivity and manages DVB-T2 signals well.

ALPHA 3 HD 700

The ALPHA 3 HD 700 aerial has **grid reflectors** and is quick and easy to install due to the quick-fit balun and reflectors. It is a **3 element** aerial.

5G integrated filter Easy mounting no tools required

ALPHA 5 HD 700

The ALPHA 5 HD 700 aerial has **grid reflectors** and is quick and easy to install due to the quick-fit balun and reflectors. It is a **5 element** aerial.

5G

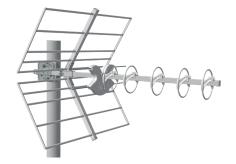

integrated filter

Easy mounting

no tools required

Robust aerial

ALPHA5+ LTE700

This version has **tube reflectors** and is particularly robust due to the cradle fixing using bolts and wingnuts. It is a **5 element** aerial.

Easy mounting no tools required

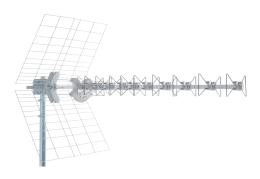

BLU 5G Series

The BLU 5G range of UHF aerials are equipped with **grid reflectors**, F connector and a **5G LTE integrated filter**. **They can be assembled and fitted without tools** and have pre-mounted director elements, quick-fit balun, reflectors and mast bracket with elevation adjustment.

With **high gain, optimum impedance matching and excellent directivity** they are ideal for managing DVB-T2 signals, which require extra protection from interference and provide good signal quality into the distribution network or outlets.

The materials used for the BLU 5G aerials have been chosen with great consideration to guarantee good **mechanical strength** and the innovative pole mounting with elevation adjustment ensures excellent wind resistance.

Robust aeria

5G Log Periodic Series

These Fracarro Log Periodic 5G aerials have been **redesigned to obtain excellent 5G LTE filtering**. They are pre-assembled and easy to connect due to the F connector being located near the mast clamp. These aerials can be mounted vertically or horizontally with no additional parts required.

The meticulous design of these aerials is highlighted by the **special connection to the dipole** which provides good contact reliability with the F connector in all environments as it is protected by a weatherproof cover. The **mechanical fixing strength** of the elements to the cradle and the antenna to the pole are very robust and reliable.

New design for E 5G filtering no

Easy mounting no tools required

TAU 5G Series

The TAU 5G aerials have been **redesigned** and developed to **optimise the filtering of 5G LTE signals**.

These UHF band Yagi aerials, with F connector, can be **assembled and fitted without tools** and have pre-mounted elements, quick-

fit balun, reflectors and mast bracket with elevation adjustment.

The 8mm extruded aluminium tubes offer great mechanical strength to the TAU 5G aerials which are also **light in weight** and have rounded elements.

TAU11/45 5G

The TAU11/45 5G aerial has **grid reflectors** and is quick and **easy to install** due to the quick-fit balun and reflectors.

New design for 5G filtering Easy mounting no tools required Robust aerial

TAU15/45 5G

This TAU15/45 5G version has **tube reflectors** and is **particularly robust** due to the cradle fixing using bolts and wingnuts.

New design for

5G filtering

Easy mounting no tools required

Robust aerial

TAU 5G KILLER+

UHF band Yagi aerial with **double filtering**: it combines the **5G and 4G LTE** frequencies selection given by the elements geometry, to the **5G filter integrated** in the radiator dipole.

New design for 5G filtering Easy mounting no tools required Robust aerial
