

PA5M

Taps and splitters

5-output clamp splitter of the PAM series in the TV and Satellite band (5-2400MHz).

Technical Chars

- Thanks to the **unique retaining clip**, the central connector remains integral with the rest of the mechanics, facilitating cable attachment.
- The **very small dimensions** and the clamp solution, without an F connector, considerably reduce the installation footprint.
- The **excellent shielding** guarantees the protection of the signal from **5G and 4G LTE** disturbances in the air.
- The **new mechanics with protective fins (Rev. 1)** prevent the spring of the central connector from being accidentally pressed while closing the junction boxes.
- **DC pass** from output to input ports on all the products.
