

PA4ME

Taps and splitters

4-output pole-mounting clamp splitter of the PAM series in the TV and Satellite bands (5-2400MHz) on **BOM box** for external use with **included clamp** for pole-fixing.

Technical Chars

- Thanks to the **unique retaining clip**, the center connector remains integral with the rest of the mechanics, facilitating cable attachment.
- The **very small size** and clamp solution, without an F connector, greatly reduce the installation footprint.
- **Excellent shielding** ensures signal protection from airborne LTE noise.
- **New mechanics with protective fins (Rev. 1)** prevent the center connector clip from being accidentally pressed while closing the junction boxes.
- **DC pass-through** from the outputs to the input throughout the series.
