

PLC 2x32 MINI B

Splitters

32-way PLC miniaturised splitter with 2 inputs; suitable for the realization of redundancy in GPON systems; based on waveguide planar technology that allows **very low insertion losses**.

Suitable for low cost and high performance optical distribution, in several installation types.

Technical Chars

- SC/APC connectors
- 0.9 m patch cords
- Very high return loss
- Compact design
- New "blockless" MINI versions
 - Chip housed inside a tubular casing, eliminating the need for an ABS block
 - 900µm input/output fibres, offering greater resistance to stress and bending
