# M8IBUS

Expansion modules

Expansion cards with 4 inputs (M4IBUS) or 8 inputs (M8IBUS) that allows to increase the number of zones of the wired control panels of the Defender system. Thanks to the RS485 BUS connection, it is possible to remote these modules within the system or to create concentrator points without having the need to bring all the zones to the control center.If necessary, the M8IBUS module can be programmed to manage only 4 of the 8 available inputs according to installation needs. This feature makes zone management more versatile; in this mode it can also be used as an expansion for DEFENDER 8 and DEFENDER 12 control panels It is possible to house these modules directly in the control panel using the optional MOD-BOX and/or CE64BOX enclosures

Technical Chars

- The module is equipped with electronics for handling fast alarms (vibration, wire...)
- Removable terminal block
- Clamp for tamper protection

M8IBUS		
Code		911060
Description		Expansion cards with 4 inputs (M4IBUS) or 8 inputs (M8IBUS) that allows to increase the number of zones of the wired control panels of the Defender system. Thanks to the RS485 BUS connection, it is possible to remote these modules within the system or to create concentrator points without having the need to bring all the zones to the control center.If necessary, the M8IBUS module can be programmed to manage only 4 of the 8 available inputs according to installation needs. This feature makes zone management more versatile; in this mode it can also be used as an expansion for DEFENDER 8 and DEFENDER 12 control panels It is possible to house these modules directly in the control panel using the optional MOD-BOX and/or CE64BOX enclosures
Dimensions and packaging		
Pieces		1
EAN code		8016978045518
Packaging dimensions	mm	108 x 44 x 93
Product dimensions	mm	80 x 80 x 25
Packaging weight	kg	0.102
Weight	kg	0.07
