

CTGSM PRO

Dialers

STAND ALONE telephone dialer working on PSTN network and also GSM, to provide maximum security even in case of PSTN line absence.

Equipped with a backup battery, it can be used as a small control panel, and thanks to the 4 inputs/outputs on board, it is possible to manage additional sensors or signallers.

Technical Chars

- Four programmable inputs to control external equipment such as alarm system relays, flood warning, control systems, infrared, dual-technology and magnetic sensors
- Four programmable outputs for controlling sirens and optical beacons
- Useful for upgrading even existing systems not equipped with BUS connection technology
- Fully compatible with third-party systems
- User-recordable voice message and SMS alert programmable from keypad
- GSM network support. QUAD BAND, 850/900/1800/1900MHz
- Phonebook of up to 20 numbers that can be used for both voice and SMS calls
